PRICE: **£45.00** Hardback

- Piet Boon is one of the most talked about modern designers in the Netherlands
- Both the styling and photography are overwhelming and memorable

His first book was an international bestseller, and in this publication, Boon shows us his new projects, including an astonishing apartment in the heart of New York. Boon's modern classic and austere style retains a classical touch as a consequence of its obvious affinity with pure, traditional building materials and architectural styles. His books show, through wonderful colour photographs, that his creations have an enduring appeal.

Piet Boon started his career as a carpenter. Now he is gaining fame and recognition in the U.S. where his projects regularly catch the attention of style magazines. He is known as the no-nonsense Dutch style. He also has a line of furniture called 'Piet Boon Zone'.
